

PHA 6125

Introduction to Quantitative Pharmacology

FALL 2021
3 credit hours

This course consists of a series of lectures and active learning/hands on sessions (ALS) structured in 8 different modules focused on general principles of drug pharmacology. Major topics are principles of drug pharmacokinetics (PK) (including drug absorption, distribution, metabolism and elimination, ADME) and pharmacodynamics and the interpretation of pharmacology in a quantitative fashion. This course is aimed to expose students to comprehensive case examples to apply principles and concepts.

Course faculty and teaching hours

Course coordinators

Dr. Valva Vozmediano (V V)

Email: valva@cop.ufl.edu

Office: 465/ORL

Phone: 407-313-7052

Office Hours: By appointment ONLY

Dr. Rodrigo Cristofolletti (R C)

Email: rcristofolletti@cop.ufl.edu

Office: 463/ORL

Phone: 407-313-7115

Office Hours: By appointment ONLY.

Teaching Partners:

Dr. Stephan Schmidt (SS)

Email: sschmidt@cop.ufl.edu

Dr. Monica Rodriguez

Email: mrodriguez@dynakin.com

Dr. Sarah Kim (SK)

Email: sarahkim@cop.ufl.edu

Dr. John C. Lukas

Email: jlukas@dynakin.com

Dr. Richard Lalonde (RL)

Email: richard.lalonde@cop.ufl.edu

Classes
Room

Friday 9:30-11:00 am
P4-20 (Gainesville)
room 462 (Lake Nona)

Course-Level Objectives

Upon completion of this course, students will be able to understand and apply the concepts and principles of pharmacokinetics and pharmacodynamics and its role in designing optimal dosing regimens. Specifically:

1. Visualize the drug development process, familiarize with the information required to build the drug label and understand how PK and PD studies help to inform it.
2. Understand and explain the following concepts: first-order elimination, zero-order elimination, half-life, volume of distribution, and clearance.
3. Understand and explain the following concepts: first-order absorption, flip-flop kinetics, and drug absorption.
4. Predict the effect of some physiological processes, as blood flow, intrinsic clearance or protein binding affect PK processes.
5. Identify whether a drug is predominately reabsorbed or secreted based on renal clearance and protein binding.
6. Predict the relationship between pH (and urine flow) and renal clearance.
7. Apply pharmacokinetic equations to derive pharmacokinetic parameters, and pharmacokinetic parameters to predict plasma concentration over time, maximum plasma concentrations and area under the curve.
8. Recommend dosing regimens in different clinical situations.
9. Understand the basic pharmacodynamics principles and models.
10. Understand how growth, aging and disease affect drug's PK and PD, and the considerations behind selecting dosing regimens for special populations.
11. Access different case examples on the application of pharmacokinetic and pharmacodynamics principles for dose selection.

Course Pre-requisites

There are no pre-requisites for this course

Course Co-requisites

There are no co-requisites for this course

Course Outline

Module 1: Generalities

Overview of the drug development process. Importance of PK/PD (RL)

Fundamental concepts and basic PK (and PD) parameters (RC)

Module 2a: ADME processes

Clearance: Renal and hepatic (SS)

Module 2b: ADME processes

Protein Binding and Drug Distribution (VV)

Module 2c: ADME processes

Absorption (RC)

Module 3: Non-compartmental PK

Non-compartmental PK (SK)

Module 4a: Intravenous Pharmacokinetics

One-compartment Model (VV)

Module 4b: Intravenous Pharmacokinetics

Multi-compartment Model (VV)

Module 4c: Intravenous Pharmacokinetics

Zero-order infusion and steady state (VV)

Exam 1: modules 1-4

Module 5a: Extravascular PK

Modeling absorption related processes (RC)

Module 5b: Extravascular PK

In vitro – in vivo correlations (RC)

Module 5c: Extravascular PK

Bioavailability and bioequivalence (RC)

Module 6: Pharmacokinetics of large molecules

PK of Protein Therapeutics (SS)

Nonlinear PK: Michaelis Menten kinetics and target mediated drug disposition (TMDD) (SS)

Module 7: Pharmacodynamics

Introduction to Pharmacodynamics (MR, JCL)

PK/PD Applications (MR, JCL)

Module 8: PBPK

Introduction to PBPK (RC)

Module 9a: PK/PD Special Populations

Pediatrics (VV)

Geriatrics (VV)

Module 9b: PK/PD Special Populations

Renal and hepatic impairment (VV)

Exam 2: modules 5-9

Course calendar

<i>Week#</i>	<i>First day of the week</i>	<i>Module</i>	<i>Topic</i>	<i>Active learning sessions</i>
<i>Week 1</i>	23rd-Aug-2021	Module 1	Overview of the drug development process. Importance of PK/PD (RL) Fundamental concepts and basic PK (and PD) parameters (RC)	
<i>Week 2</i>	30th-Aug-2021	Module 2	Clearance: Renal and hepatic (SS) Protein Binding and Drug Distribution (RC) Absorption (RC)	
<i>Week 3</i>	6th-Sep-2021	Module 3	Non-compartmental PK (SK)	ALS 1 Friday Sep 10th, 2021
<i>Week 4</i>	13th-Sep-2021	Module 4a	One-compartment Model (VV)	
<i>Week 5</i>	20th-Sep-2021	Module 4b	Multi-compartment Model (VV)	ALS 2 Friday Sep 24th, 2021
<i>Week 6</i>	27th-Sep-2021	Module 4c	Zero-order infusion and steady state (VV)	ALS 3 Friday Oct 1st, 2021
<i>Week 7</i>	4th-Oct-2021	Exam #1	Modules 1-4	
<i>Week 8</i>	11th-Oct-2021	Module 5a	Modeling absorption related processes (RC)	
<i>Week 9</i>	18th-Oct-2021	Module 5b	In vitro – in vivo correlations (RC)	ALS 4 Friday Oct 22nd, 2021
<i>Week 10</i>	25th-Oct-2021	Module 5c	Bioavailability and bioequivalence (RC)	ALS 5 Friday Oct 29th, 2021
<i>Week 11</i>	1st-Nov-2021	Module 6	PK of Protein Therapeutics (SS) Nonlinear PK: Michaelis Menten kinetics and target mediated drug disposition (TMDD) (SS)	
<i>Week 12</i>	8th-Nov-2021	Module 7	Introduction to Pharmacodynamics (MR, JCL) PK/PD Applications (MR, JCL)	ALS 6 Friday Nov 12th, 2021
<i>Week 13</i>	15th-Nov-2021	Module 8	Introduction to PBPK (RC)	ALS 7 Friday Nov 19th, 2021
<i>Week 14</i>	22nd-Nov-2021	<i>Thanksgiving</i>		
<i>Week 15</i>	29th-Nov-2021	Module 9a	PK/PD Special Populations: Pediatrics (VV) Geriatrics (VV)	ALS 8 Friday Dec 3th, 2021
<i>Week 16</i>	6th-Dec-2021	Module 9b	PK/PD Special Populations: Renal and hepatic impairment (VV)	ALS 8 Friday Dec 10th, 2021
<i>Week 17</i>	13th-Dec-2021	Exam #2	Modules 5-9

Other reading material will be provided during the course.

Students grading

First Exam	20%
Second Exam	30%
Computer Projects	50%

Grading Scale

> 92.5%	A
89.5-92.4%	A-
86.5-89.4%	B+
82.5-86.4%	B
79.5-82.4%	B-
76.5-79.4%	C+
72.5-76.4%	C
69.5-72.4%	C-
66.5-69.4%	D+
62.5-66.4%	D
59.5-62.4%	D-
< 59.4%	E

Rounding of grades: Final course grade will only be rounded up if the decimal is 0.5 or higher. The above scale depicts this policy.

Academic Integrity Policy

Students are expected to act in accordance with the University of Florida policy on academic integrity (<http://www.dso.ufl.edu/sccr/honorcodes/honorcode.php>). This Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obliged to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult the Course Coordinators. Students are also expected to abide by the UF Honor Code.

The following is the UF Honor Pledge: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity by abiding by the Honor Code.

On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

Faculty and Course Evaluations

Faculty Evaluations

You will receive an email from the Curricular Affairs Office requesting to complete the faculty evaluations. Faculty evaluations are important feedback for your course instructors and the University and receive major consideration in the tenure and promotion process. Your input via evaluations can make a difference in our College's teaching activities, so participate, evaluate and our College will be better for it.

The online faculty evaluation system is completely anonymous. When you submit an evaluation, the system marks that you have submitted an evaluation for the section (so you cannot submit multiple evaluations), but from that point on, there is no connection between you and the evaluation data. Faculty evaluations also provide useful information for students. The results of your evaluation input are made available to all students in future semesters at:

<http://www.aa.ufl.edu/aa/evaluations/search/>.

Course Evaluations

In the last few weeks of the course, you will receive an email with directions for completing a course evaluation. Note, course evaluations provide feedback that is different from the Faculty evaluations and both are very important to continuous improvement of our program. Course evaluations are used by the College to identify how to improve the how the course is designed and delivered. Therefore, our Courses will be better through your completion of these evaluations. You will complete Course Evaluations via a website that is different from Faculty Evaluations. These evaluations are also anonymous.
